

Keep Critical Care Tasks Organized.

Hot Rack Workflow Management Built for Skilled Nursing Facilities

Organize, assign, and monitor important resident care activities through a structured digital workflow designed for the realities of skilled nursing.

Task Scheduling • Care Assignments • Real-Time Monitoring • Clinical Workflows • Resident Care

INTRODUCTION

In a skilled nursing facility, daily care involves more than simply knowing what needs to be done.

Staff need to know which resident needs attention, what activity needs to be completed, who is responsible, and when it needs to happen.

When these activities are managed through paper lists, verbal handoffs, or disconnected processes, important tasks can become difficult to track.

LTC Apps Hot Rack brings care activities into a structured digital workflow.

The module helps staff schedule, assign, and monitor resident care activities in real time, helping teams stay organized throughout the day.

Built Around Real SNF Care Workflows

Nursing Teams

Organize assigned resident care activities and keep important tasks visible.

Directors of Nursing

Gain better visibility into care activities and how work is being assigned across the facility.

SNF Administrators

Support more consistent operational coordination by bringing critical workflows into one platform.

POWERING THE DAY-TO-DAY OPERATIONS OF YOUR SNF

From resident care to staffing and facility operations, LTC Apps gives your team purpose-built digital tools.

THE RESULT?

Critical tasks stay visible.

Staff know what needs to be done.

Care activities are easier to coordinate.

Your facility works from one operational foundation.

RESIDENT & REVENUE OPERATIONS

- Admissions & Patient Intake
- Eligibility Verification
- Medical Code Analysis
- Resident Appointments

PEOPLE & STAFFING

- Staff Scheduling
- Human Resource Management
- Staff Broadcasts

FACILITY & SUPPLY OPERATIONS

- Order & Inventory Management
- Hot Rack
- Maintenance
- Visitor Management

04. HOT RACK

Bring Clinical Supply Workflows Under Control

Hot Rack provides a digital workflow for managing clinical supply processes and helping nursing teams keep track of critical items.

Key Features

- Clinical supply workflow management
- Supply tracking
- Resident-related supply workflows
- Centralized operational visibility
- Support for nursing workflows
- Better coordination between clinical and supply teams

Why It Matters

LTC Apps helps bring the workflow into one organized digital environment.

The SNF platform specifically identifies Hot Rack as its clinical supply hot rack workflow management module.

BUILT FOR SKILLED NURSING. DESIGNED FOR SIMPLICITY.

Purpose-Built for SNFs

LTC Apps is designed around skilled nursing workflows and the operational realities of SNF teams.

Modular by Design

Use Hot Rack alongside the other LTC Apps modules that support your facility's specific workflows.

One Connected Platform

Hot Rack works as part of the same LTC Apps platform used for scheduling, HR, admissions, orders, maintenance, and other facility operations.

Designed for Small & Mid-Size Facilities

Get purpose-built operational software without having to adopt a massive enterprise platform.

Works Alongside Your Clinical EHR

LTC Apps is an SNF operations platform, not a replacement for a full clinical EHR. It supports the operational workflows that run alongside your existing clinical systems.

READY TO ORGANIZE YOUR CLINICAL WORKFLOWS?

See LTC Apps Hot Rack in Action.

Your nursing team already has enough to manage.

Important resident care activities shouldn't depend on scattered notes, verbal reminders, or disconnected workflows.

LTC Apps Hot Rack gives your team a structured way to schedule, assign, and monitor care activities helping your facility keep important work visible and organized.
