

Turn Medical Records Into Actionable ICD-10 Codes.

AI-Powered Medical Code Analysis Built for Skilled Nursing Facilities

Reduce manual coding time and help your billing team move from researching medical records to reviewing verified ICD-10 code suggestions.

PDF Record Analysis • Clinical Text Input • AI-Powered ICD-10 Coding • Faster Review •
SNF Billing

INTRODUCTION

Medical coding can become one of the biggest bottlenecks in SNF billing.

A single resident record can contain discharge summaries, physician notes, assessments, treatment records, and other clinical documentation. Billing staff have to review those documents, identify relevant diagnoses, cross-reference ICD-10 codes, and verify that the selected codes match the documentation.

LTC Apps Medical Code Analysis uses AI to perform the initial code identification in seconds, giving your billing team a faster starting point.

From Researching Codes to Reviewing Codes.

Upload a PDF medical record or paste up to 20,000 characters of clinical text. LTC Apps analyzes the information and returns ICD-10 diagnostic codes for your billing team to review and verify.

Built for the Teams Behind SNF Billing

SNF Billing Coordinators

Process ICD-10 codes faster and spend less time searching through medical records.

Business Office Managers

Keep coding from becoming a bottleneck during high-volume admission periods.

SNF Administrators

Help your billing team process records faster without relying entirely on dedicated coding resources.

POWERING THE DAY-TO-DAY OPERATIONS OF YOUR SNF

From admissions to billing, LTC Apps gives your facility purpose-built digital tools.

THE RESULT?

Faster billing workflows.

Less manual research.

Connected resident information.

One operational platform.

RESIDENT & REVENUE OPERATIONS

- Admissions & Patient Intake
- Eligibility Verification
- Medical Code Analysis
- Resident Appointments

PEOPLE & STAFFING

- Staff Scheduling
- Human Resource Management
- Staff Broadcasts

FACILITY & SUPPLY OPERATIONS

- Order & Inventory Management
- Hot Rack
- Maintenance
- Visitor Management

05. MEDICAL CODE ANALYSIS

Make Medical Coding Workflows More Efficient

Support your billing and clinical operations teams with tools designed to analyze medical coding information and improve claim-related accuracy.

Key Features

- ICD-10 code analysis
- Medical record analysis
- Coding support
- AQ Code analysis
- MDS-related data
- Quality measurement support
- Identification of relevant clinical data
- Support for billing and reporting workflows

Why It Matters

Turn complex clinical information into actionable coding insights.

LTC Apps identifies Medical Code Analysis as an ICD-10 analysis workflow designed to support SNF billing and claim accuracy.

BUILT FOR SKILLED NURSING. DESIGNED FOR SIMPLICITY.

Purpose-Built for SNFs

LTC Apps is designed around skilled nursing workflows, including admissions, eligibility, billing support, staffing, and facility operations.

Modular by Design

Add Medical Code Analysis alongside the workflows your billing and business office teams already use.

One Connected Platform

Move from admission to eligibility to coding without switching systems.

Designed for Small & Mid-Size Facilities

Get purpose-built operational software without having to adopt a massive enterprise platform.

Works Alongside Your Clinical EHR

LTC Apps is an SNF operations platform, not a replacement for a full clinical EHR. It supports operational workflows that run alongside existing clinical systems.

READY TO SPEED UP YOUR ICD-10 WORKFLOW?

See LTC Apps Medical Code Analysis in Action.

Manual ICD-10 coding can take valuable time away from your billing team especially when multiple residents are admitted in the same week.

LTC Apps uses AI to analyze medical records and clinical text, generate ICD-10 diagnostic code suggestions in seconds, and give your billing team a faster starting point for review.

Upload. Generate. Review. Move the claim forward.
